EXPERT

The Future Of Parking

Expert is one of the foremost manufacturers of mechanical car parking systems in India. Advanced yet user-friendly, our systems are highly convenient and secure. Standard or customized, our automatic and semi-automatic car parking systems cater to diverse parking needs. Especially, that of residential, commercial and government premises.

We have a thorough knowledge of residential, commercial or government properties. In fact, we collaborate with the architects and developers to meet the specific requirement of each project. It helps us to devise the best need-based parking solution in line with the property type and its end-user.

At Expert, we design car parking systems which are trusted. Most importantly, which are built to last and function with great reliability by the virtue of excellence.

Our Brand Promise

Pursuing Excellence

Team Expert is backed by highly dedicated professionals with a passion for excellence to deliver innovative, bespoke products and parking solutions for residential and commercial complexes, hospitals and healthcare centres, hotels, theme parks, community parking systems and more.

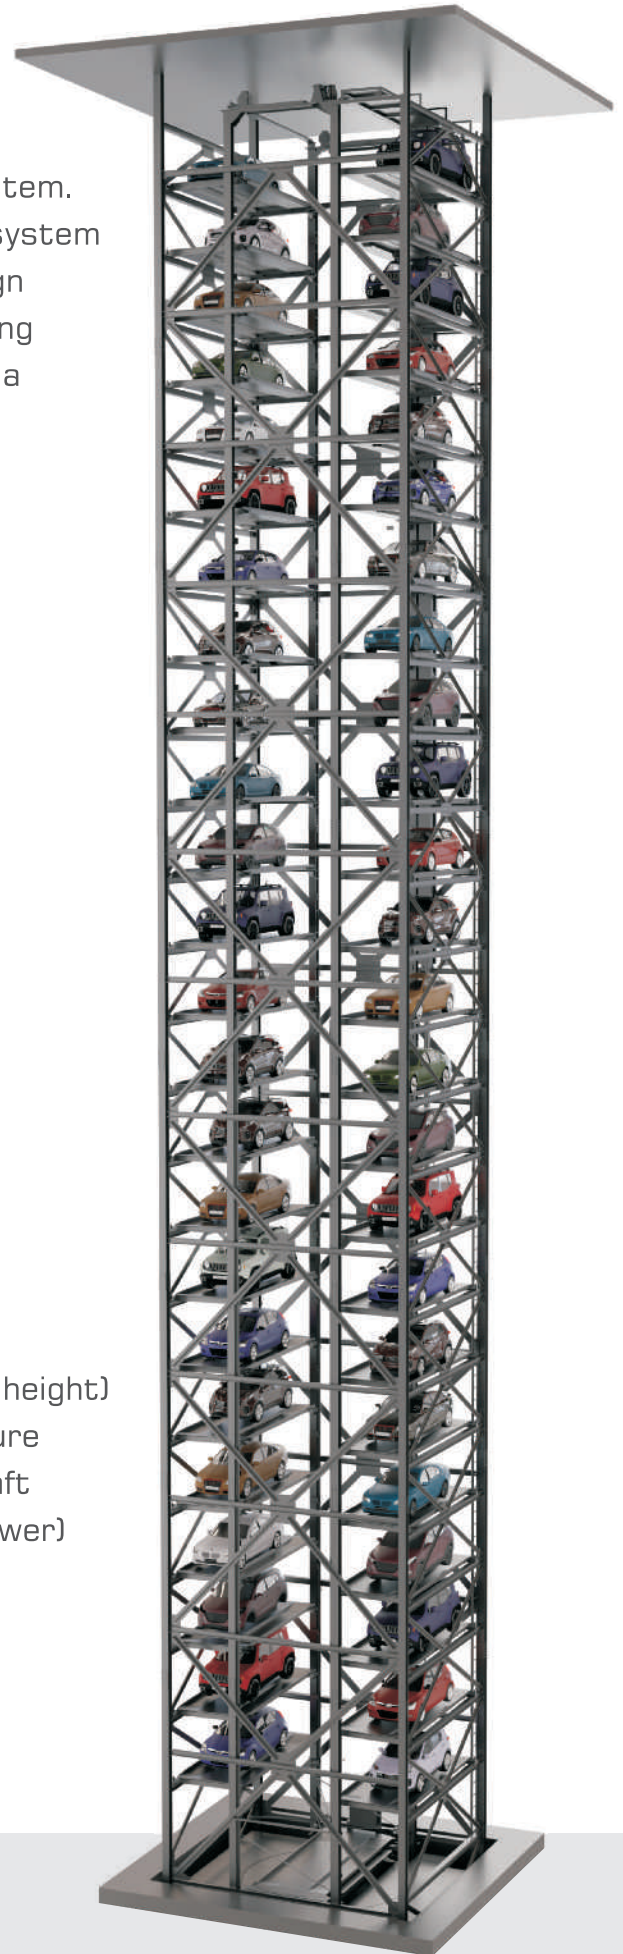

The Expert Advantage

- ≡ Space optimization
- ≡ Value Engineering
- ≡ Robust Design
- ≡ Hassle-free Parking
- ≡ Ease of Maintenance

Tower Parking System

Introducing the revolutionary Expert Tower Parking System. It is high-end, multi-level, fully automated car parking system devised for busy cities like Mumbai. Its intelligent design smartly optimizes space, saving you the hassle of finding parking spots. Save valuable time wasted in searching a parking space. Experience a seamless, hassle-free parking experience. Discover the future of parking with Expert Tower Parking System.

- ▶ Customizable as per client requirements and space availability
- ▶ Fits into the footprint of 3 cars (standard design)
- ▶ Helps save considerable space which can be utilized for other purposes
- ▶ No space intensive ramps and driveways
- ▶ Capability of lifting 2.50 tons of weight
- ▶ Quick parking and retrieval cycle with 99% uptime
- ▶ Protects cars from theft and damage
- ▶ Eco-friendly as no CO2 emission from the car during operation
- ▶ Vehicle turntable inside the parking system or in driveway available as option
- ▶ Facilitates design in 0:1, 1:1, 1:2, 2:2, 2:3 and 3:3 configuration (can be customized design as per requirement of additional number of cars)
- ▶ Machine Room Less (MRL) parking system (accommodates maximum cars in available/allowable height)
- ▶ Facilitates customized design as standalone structure tower (Open Tower), Steel Tower within the RCC Shaft (Closed Tower) & Bracket load on RCC Shaft (RCC Tower)

Puzzle Parking System

An efficient and space saving parking system – designed to accommodate maximum cars which reduces carbon footprint. Its insightful, puzzle-like design, ensures multiple vehicles to be parked in a compact space. Ideal for residential or commercial complex or other facility,

Puzzle Parking System provides a smart and secure solution. So experience a convenient parking system and put an end to your car parking worries!

- ▶ Also known as 'Lift & Slide' Parking Systems (a combination of platforms/pallets enable puzzle-like horizontal & vertical movements to park or retrieve cars)
- ▶ An independent, electro mechanical, semi-automatic type parking system
- ▶ Lifting capacity of 2-3 tons as per client requirement
- ▶ Customized design as per height, width & length for SUVs, Sedans or combination of SUV and Sedan
- ▶ Can be customized for more than 2 levels and up to 9 levels & up to 3 levels below ground
- ▶ Ensures a quick vehicle in and out time

Suspended No Post Parking System

Popularly called as Suspended Parking System, it one of the preferred parking systems in the metro cities. This system enables vehicle parking on suspended platforms supported by the building structure. In turn, it provides a column-free area for additional parking below. Ideal for properties with limited parking space, No Post Parking System provides an efficient, easy-to-operate option to solve parking woes.

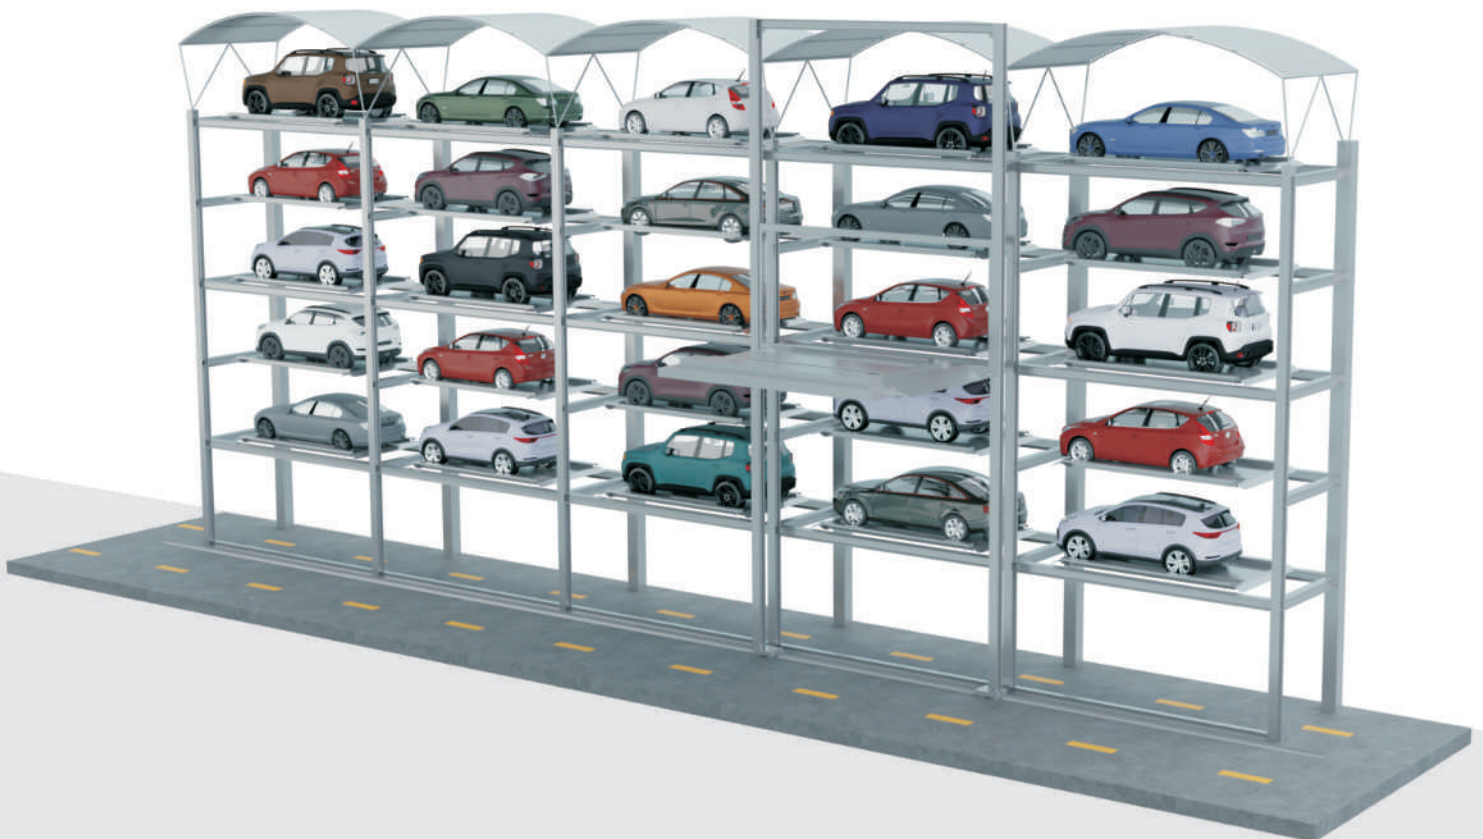

- ▶ Provides a lifting capacity of 2.30 tons
- ▶ Facilitates convenient parking option in the driveway or drive aisles for maximum capacity
- ▶ Easy to install on podium or basement levels, even in open areas as per the requirement of the customer
- ▶ Specially designed platform is suspended from a structural framework that can be supported from floor or ceiling and integrated with building structure (column & beam)

Alley Parking System

With the rising number of cars in India and the world over, there has been severe paucity of space. Hence, one needs to think beyond the conventional parking. Expert Alley Parking System is the answer with its vertical parking option to tackle the issue. Insightfully designed to accommodate maximum cars of various sizes, switch to this highly secure, efficient, user-friendly parking system.

- ▶ Available in 2 levels and up to 6 levels
- ▶ Helps keep the driveway clear for vehicular traffic
- ▶ Zero maneuvering (drive straight In or out)
- ▶ Easily installed next to compound wall/building structure
- ▶ An innovative design that provides maximum car parks in minimum floor space

Stack Parking

- ▶ Cost minimization with space maximization
- ▶ Efficient lifting on double cylinder
- ▶ Manual operation; indoor/outdoor use
- ▶ Full travel anti-fall lock
- ▶ Enables front/reverse parking modes
- ▶ Ideal for all vehicles (Sedans, SUVs, variable widths)

EXPERT

Pit-Stack Parking

- ▶ Facilitates up to 3-level parking (manual operation)
- ▶ Independent parking – both platforms move up and down at once
- ▶ Suited for indoor/outdoor usage
- ▶ Designed to allow maximum car height in pit level (car height + 200mm)
- ▶ Ideal for all vehicles (sedans, SUVs, variable widths)
- ▶ Enables bolting on concrete slabs/footings (easy to install or dismantle)

EXPERT

4 High Parking System

- ▶ Manual operation :
Indoor/outdoor use.
- ▶ Built in safety latch at each level:
patented full-time anti-fall system.
- ▶ Simply bolted in place on concrete
slab or footings;
can be disassembled and moved.
- ▶ Suitable for all personal vehicles;
Sedans, SUV; variable widths.

Clientspeak

"We are very pleased with Expert's Suspended Parking System. Their team set up the system which is simple to use and convenient. Its quality is superior and so are the services. We would surely use their parking system in our future projects."

Legend Siroya Group, Kamal CHS, Vile Parle (E)

"Our experience of using No Post, 2 Post and Pit Stack parking systems from Expert is satisfactory. It solved our parking woes due to less space. Surprisingly the less space was utilized so effectively that even a SUV was accommodated."

Shraddha Enterprises, Shraddha Heights, Vile Parle (E)

"Expert's superior quality and services impressed us. No Posts and 3 Two Post Parking systems have been installed in our project. Every aspect is satisfactory, especially, its easy-to-use feature. Considering install in our upcoming projects."

Shreenath Constructions, Vrindavan Cooperative Housing Society, Ghatkopar (E)

"This is to certify that M/s Expert Parking Systems Private Limited have installed Expert Tower Parking System (Hydraulic) in our project named Shri Sai Datta C.H.S., Matunga (West), Mumbai. They have provided us unique design where we were able to park 4 (four) additional cars, i.e. 24 (twenty four) cars - all SUVs in the same space where others were providing 20 cars. We are highly satisfied with the performance and installation of the system. Their team has also been professional along with the after sales service. We wish them best of luck for all future endeavours and would also recommend their systems."

M/s. Shri Sai Nirmala Developers, Shri Sai Datta C.H.S. Ltd. Matunga (W)
